Project Definition

Project Name: MAP-it

Team Contact: Mohammad Jamil / mjamil@loyola.edu & Brooke Carson / blcarson@loyola.edu

Client Contact: Adam Butt / Adam.butt@isb.org

Summary:

The Islamic Society of Baltimore (ISB) is a local mosque based on Woodlawn, MD and has been an established place of worship and K-12 education establishment for over 25 Years. Over the past 5-7 years, they have been growing their Muslim Athletic Program (MAP), an effort to promote active/healthy lifestyle within the community through various sports camps and tournaments. The program includes but not limited to Basketball, Flag Football, Cricket, Karate, & Baseball for boys, girls, Men, & Women. Over the past 1.5 years, ISB MAP has been dormant mostly due to the ongoing pandemic, however community leaders are looking to revitalize and reintroduce monthly tournaments, summer camps, and open recreational spaces. Adam Butt, one of the head organizers of MAP, reached out to our team to help them rebuild their entire website to provide a fresh and inviting website that is easily accessible & simple. The website should offer users an opportunity to learn about the program, services, an interactive calendar, registration forms, and a media gallery.

Important Features:

- About Us/Mission Statement Page

- Interactive Calendar with dates of all programs

- Registration forms for Events (No Payments through Website)

- Media gallery of every event, tournament, and fields

- Live Tracking of Ongoing Events

- Simple & Interactable UI with easy navigation
